أولاً : الشروط العامة للمناقصة

GENERAL CONDITIONS OF THE TENDER

- 1 The Tenderer must be registered with the Tender Board and have good experience in the required work. ١ يشترط في مقدم العطاء أن يكون مسجلاً لدى مجلس المناقصات.
- 2 The Tenderer undertakes that the prices indicated in the Tender are fixed and valid for ninety (90) days from the date of the submission of the Tender, and no amendment to that shall be allowed. ٢ يلتزم مقدم العطاء بأن تكون الأسعار المقدمة بعرضه ثابتة وسارية المفعول لمدة ٩٠ يوماً من تاريخ تقديم العرض ولا يسمح بتعديلها لأي سبب من الأسباب
- 3 The Ministry shall not bear any responsibility for expenses or losses in preparation for the Tender. ٣ الوزارة غير مسئولة عن أي مصروفات أو خسائر قد تترتب على إجراءات التحضير لهذه المناقصة .
- 4 Tenderers must abide by the laws in force in the Sultanate of Oman. ٤ على مقدمي العطاءات التقيد والعمل وفق القوانين المعمول بها في سلطنة عمان .

- 5 In the event of any dispute between the two parties, such dispute shall be referred to the Court of Competent jurisdiction in Muscat.
- ٥ في حالة حدوث أي نزاع أو خلافات بين الطرفين الأول والطرف الثاني تكون جهة الاختصاص في النظر في هذا النزاع هي المحكمة المختصة في مسقط.
- 6 All the documents submitted with the tenders shall be treated with the utmost confidentiality.
- ٦ جميع المستندات المقدمة من مقدم العرض سوف تعامل على أنها سرية للغاية .
- 7 The Tenderer must enclose with the Tender an additional true copy thereof, and the Ministry shall have the right to reject any tender having no such copy enclosed in addition to that.
- ٧ يلتزم مقدم العطاء بإرفاق نسخة إضافية طبق الأصل من العطاء ويحق للوزارة رفض أي عطاء لا ترفق معه النسخة الإضافية .
- 8 Offer prices must be written in ink in R.O., figures, and words. The price list must be dated, stamped, and signed by Tenderer.
- ٨ تكتب أسعار العطاء بالمداد بالعملة العمانية رقماً وحرفاً ، ويجب ان تكون قائمة الأسعار مؤرخة ومختومة وموقعة من مقدم العطاء.
- 9 Erasion or deletion is impermissible in the table of quantities; every correction of price or else must be rewritten in ink, in figures and words and signed
- ٩ لا يجوز الكشط أو المحو في جدول الفئات ، وكل تصحيح في الأسعار أو غيرها يجب إعادة كتابته بالمداد رقماً وحرفاً وتوقيعه.
- 10 The Tenderer shall not delete any terms of the contract or technical specifications or amend that.
- ١٠ لا يجوز لمقدم العطاء شطب أي بند من بنود العطاء أو من المواصفات الفنية أو تعديلها مهما كان نوع ذلك التعديل .

- ١١ يكون العطاء ساري المفعول من وقت تصديره بمعرفة مقدم العطاء بغض النظر عن ميعاد إستلامه من قبل الجهة المختصة بالوزارة حتى نهاية مدة سريان العطاء ومع ذلك يعمل بأي خفض على الأسعار الواردة بالعطاء يصل قبل الميعاد المحدد لفتح المظاريف.
- 11 The Tender shall be valid from the time it shall be issued with the Tenderer's knowledge, regardless of the time of its receipt by the competent authority at the Ministry, up to the end of its validity. Nevertheless, any reduction of the prices outlined in the Tender shall be acceptable, provided that it shall arrive before the time fixed for opening the envelopes.
- ١٢ يجب أن يرفق بالعطاء بيان بأسماء الأشخاص المصرح لهم بالتعاقد لحساب الشركة أو المنشأة ومدى هذا الحق وحدوده ونماذج امضاءاتهم المعتمدة قانوناً وأسماء المسؤولين في الوزارة الذين لهم مصلحة في هذا العطاء .
- 12 The Tenderer must enclose a statement of the names of the persons authorized to contract on account of the company or the enterprise, the extent and limits of such authorization, the specimen of their duly approved signature, and the names of the Ministry's officials having an interest in such Tender.
- ١٣ يجب أن تصل العطاءات إلى الوزارة في الوقت واليوم والتاريخ المحدد بالإعلان ولا يُعتد بالعطاءات المقدمة بعد هذا الميعاد أياً كانت أسباب التأخير .
- 13 Tenders must be submitted at the time, day, and date stipulated in the Tender Notice, and no tenders arriving after that shall be considered in any event.
- ١٤ يعتبر تقديم العطاء إقراراً من مقدمه بأنه إطلع على كافة شروط المناقصة ومخططات المشروع ومواصفاته وجداول الكميات ، وإنه علم بطبيعة الموقع ومكانه وجميع الأمور التي تتعلق بتنفيذ العطاء وإتمامه وتسليمه طبقاً لأحكام الإتفاقية والشروط والمواصفات الفنية وأي استفسار أو إستيضاح يتعلق بوثائق المناقصة يتعين تقديمه إلى الوزارة وذلك قبل الموعد المحدد لتقديم العطاءات بوقت كاف .
- 14 Submission of the Tender shall be deemed a declaration by the Tenderer that he has perused all the Tender specifications, the project plans, and the tables of quantities and that he knows the nature of the site and its location, as well as all matters concerning the performance of the Tender, its completion and handing over terms and specifications. Any further clarification in connection with the Tender documents shall be submitted to the Ministry within an

ample time before the time fixed for the submission of tenders.

- 15 The Successful Tenderer shall submit a bank guarantee to the amount of 5% of the value of his accepted Tender as a performance bond within ten days, maximum, from the day following his notification by a registered letter of the acceptance of his Tender, and twenty days for contracts concluded abroad. Such bank guarantee shall be valid for a period commencing on the date of its issue up to the completion of work or the date of the certificate of final handing over, whichever is later. Suppose the successful Bidder shall not submit the performance bond within the specified period. In that case, the Ministry may, needless any actions, cancel awarding the contract and confiscate the Bank guarantee amount without prejudicing the Ministry's right to claim damages and loss that cannot be recovered from the provisional deposit – The Bank Guarantee.
- ١٥ على صاحب العطاء المقبول أن يقدم ضماناً مصرفياً بقيمة ٥% من قيمة ما رسي عليه تأمينياً لضمان حسن التنفيذ، وذلك في فترة لا تتجاوز عشرة أيام من اليوم التالي لإخطاره بكتاب مسجل يفيد قبول عطاءه وعشرين يوماً بالنسبة للعقود التي تبرم خارج السلطنة، ويكون ساري المفعول لمدة تبدأ من وقت إصداره الى ما بعد انتهاء فترة العمل أو تاريخ شهادة التسليم النهائي أيهما أبعد.. وإذا لم يقدم صاحب العطاء المقبول بتقديم ضمان حسن التنفيذ في المدة المحددة يجوز للوزارة ودون حاجة إلى أية إجراءات أن تلغي الترسية وتصادر التأمين المؤقت وكل ذلك دون مساس بحق الوزارة في المطالبة بالخسائر والأضرار التي لا يتيسر لها استردادها من التأمين المؤقت.
- 16 The Ministry shall not be deemed to have accepted the Tender and legally bound thereby except after the signature of the contract by the two parties.
- ١٦ الوزارة غير ملتزمة بالعطاء قانوناً إلا بعد توقيع الاتفاقية.

- ١٧ على مقدم العطاء تقديم قائمة بأسماء المنتجات الوطنية التي يرغب في استخدامها في المشروع. حسب الملحق (أ).
- 17 All Offers shall be accompanied by a list of the Omani Products to be used in the project as stated in annex (a).
- ١٨ يلتزم مقدمي العطاءات من خارج السلطنة بتقديم أسعارهم بالريال العماني أو بالعملة الأجنبية مع ضرورة ذكر سعر صرف تلك العملة بالريال لعماني.
- 18 Bidders from Outside Oman shall present their prices in Omani Rial or a foreign currency on condition that they state its exchange rate to Omani Rial.
- ١٩ في حالة التوريدات، للمجلس الحق في تجزئة إسناد عقود التوريدات بين اثنين أو أكثر من مقدمي العطاءات.
- 19 The Committee can divide the import agreement order between two or three bidders.
- ٢٠ يجوز بناء على طلب مقدم مما لا يقل عن (٣٠%) من مجموع المشاركين في المناقصة، تمديد موعد تقديم العروض حسب المدة المطلوبة أو الى متوسط المدد المطلوبة في حالة تباين هذه المدد.
- 20 Upon prior request of not less than 30 bidders, the duration of offer submission may be extended to the requested date or an average of the requested period in case of difference of durations.
- ٢١ يجب أن يرفق مع كل عطاء مقدم بيان بأسماء الأشخاص المفوضين بالتعاقد لحساب مقدم العطاء، ونطاق هذا التفويض وحدوده ونماذج توقيعاتهم المعتمدة قانوناً.
- 21 All Offers shall be accompanied by the names of the authorized signatories of the Bidder, their extent of capacity, the competence of authority, and their approved specimen signatures.

TECHNOLOGY DEPT.

TECHNICAL SPECIFICATIONS

BOQ & The TECHNICAL SPECIFICATIONS

Introduction:

Ministry of Commerce, Industry & Investment Promotion (hereafter also referred to as "Organization," MOCIIP," or "Client") wishes to obtain the services of a highly qualified and capable vendor(s) to develop Made in Oman Website and Portal after this referred to as the "Product," "System" or "Solution").

The participating vendor must offer a timely end-to-end solution with modern technologies to deliver rapid business process development and integration. It is achieved with a scalable solution, cost-saving delivery model, robust testing, and support methodology. Vendors are attuned to the MOCIIP's long-term interest and emphasize minimal coding requirements, avoidance of invasive systems integration techniques, and ease of Maintenance.

Additional benefits include increased workforce productivity and increased efficiency of services. Moreover, it must be secure, user-friendly, and have good integration capacity with future needs.

Main Section	Sub Section	Sub Section2	Functionality
1	Scope of Portal Functional Requirements		
1	1.1.	1.1.0	Design
1	1.1	1.1.1.	MOCIIP will expect to see at least 3 sample designs from the winning Bidder within ten working days of awarding the work. There is no need to include a sample design with this proposal. However, the vendor portfolio should show previous work of similar scope and size.
1	1.1.	1.1.2	Bidders are also required to work with the other project teams in MOCIIP in finalizing themes and look and feel standards for all the planned delivery channels of MOCIIP. The actual implementation of the finalized themes in their respective project is the responsibility of the respective project team.
1	1.1.	1.1.3	The Portal must be multi-lingual and should support Arabic and English. Adding more languages as and when required with mere configuration changes should be easy.
1	1.1.	1.1.4	Visual/textual identity elements highlighting the Government's ownership of the Portal should be prominently placed on the

			page. The national identity symbols like Flag, Ministry Logo etc., should be in a proper ratio (not squeezed or stretched) and color.
1	1.1	1.1.5	The Portal should be very flexible and highly configurable. Therefore, the selected Bidder must appreciate that virtually all design work and content should be soft-coded.
1	1.1.	1.1.6	Although the Portal will be controlled by templates from the Content Management System, the end product – and sample designs – should allow MOCIIP to show its services and content and should be well balanced and not look crowded.
1	1.1	1.1.7	The user interface design of the Portal has to be done with the following objectives in mind: - Customer navigation should be smooth; - No. Of steps to reach for any information should be minimal.
1	1.1.	1.1.8	Information Technology Authority maintains certain web development guidelines and standards that ensure consistency in the look and feel of all government portals. Bidders should ensure that the Portal complies with these standards. Bidders can refer to www.oman.om and www.business.gov.om to understand the Template and expectations.
1	1.2.	1.2.0	The following items should be amply evident from the layout: User oriented, Interactive, and Easy to Access.
1	1.2.	1.2.1	Each page should have a maximum of three screen scroll lengths.
1	1.2.	1.2.2	The Portal must operate effectively across all leading browsers and platforms, especially on IE10, Firefox 3.6, Google Chrome 9, Safari 4, Opera 9.5, and later.
1	1.2.	1.2.3	The Portal should also work in all screen resolutions with no white spaces or open borders.
1	1.2.	1.2.4	The Bidder is expected to ensure that the MOCIIP portal ranks at the top of the search results by applying appropriate SEO techniques.
1	1.2.	1.2.5	Alternate text should be provided for all non-text elements (e.g. images).
1	1.2.	1.2.6	Navigating to the home from any page with a single click should be possible.

1	1.2.	1.2.7	Extraneous information such as banners, menus, and footer information should be omitted when printing content. Therefore the Portal should provide the functionality to preview and print only the page's core content upon user request.
1	1.2.	1.2.8	The Portal must be able to keep track of the type of users accessing the Portal as well as the user's navigation trends within the Portal. Content must be displayed according to the user's interests and navigation history.
1	1.3	1.3.0	Content Management System
1	1.3.	1.3.1	The Portal's content management system should be a web-enabled multi-lingual system. No software on Users' desktop/laptop should be necessary to populate or update the Portal.
1	1.3.	1.3.2	The Portal content management system should support content creation, review, update, approval, authorization, and publication processing.
1	1.3.	1.3.3	The Portal should provide Content Management Users with an On-screen editor and a scope for HTML editing.
1	1.3.	1.3.4	The Portal's content should be fed from the Content Management System.
1	1.3.	1.3.5	A template must control the content layout within each page. Templates can be created, edited, or deleted. When edited, templates can either be saved as a clone of the original or force all pages of that type to update to the new style. The creation of templates must be an easy task (drag and drop functionality is preferable)
1	1.3.	1.3.6	The Portal pages must be very well organized and not cluttered with too many links or information.
1	1.3.	1.3.7	Bidders must suggest a content structure (Information Architecture) to the MOCIIP team based on the various target segments of MOCIIP. Moreover, cross-pollination of content is crucial to ensure users get the most from the Portal.
1	1.3.	1.3.8	The structure of the portal content must be completely flexible, employing a "tree" structure for the different tiers of information. Being able to add, edit and remove this structure is a privilege that may be granted to content managers only.

1	1.3.	1.3.9	Pages within the Portal must be able to accept different formats including but not limited to text, video, images, HTML blocks, RSS feeds, presentation slides, Blogs, Banners, etc.
1	1.3.	1.3.10	Depending on the requirements of the different user groups/departments, the Portal might have different CMS processes to manage the content independently per specific user groups' needs.
1	1.3.	1.3.11	The Portal's CMS should provide multiple authorization levels and different views for users to edit, review, and publish content for MOCIIP.
1	1.3.	1.3.12	Any content added to the Portal must first be approved per a defined set of controls. The Portal must have a workflow mechanism that allows for content to be sent for approval, reviewed, and approved electronically if needed
1	1.3.	1.3.13	Authorized content approvers must be able to view a list of content awaiting approval and then be able to accept, reject (with reasons), or edit and then accept each posting.
1	1.3.	1.3.14	The Portal must support the deletion and archiving of outdated or unwanted content. Also, when published, documents can be set to expire on a certain date and be deleted or archived automatically as desired after they expire.
1	1.3.	1.3.15	When an item is archived, it must retain its URL, which should be marked as archived. Archived content can only be viewed if the user views archived documents when navigating or searching.
1	1.4.	1.4.0	Simple Syndication (RSS)
1	1.4.	1.4.1	Tenderers must provide RSS feed functionality so that users can receive updated information regarding important events, news, Bidders published etc. as being published on the website.
1	1.5.	1.5.0	Site Map
1	1.5.	1.5.1	The Portal should have an up-to-date dynamic site map showing the website's internal pages.
1	1.5.	1.5.2	The sitemap should provide a hierarchical view of all the pages in the Portal to help users find specific pages and content easily.
1	1.6	1.6.0	Statistics

1	1.6.	1.6.1	The Portal should be able to general statistical data (and reports) about its users and their actions. The Portal should be able to show a statistic for each service.
1	1.7.	1.7.0	Important Links
1	1.7.	1.7.1	The proposed Portal should contain a page whereby important links can be displayed for reference for the web site users.
1	1.7.	1.7.2	The list of links may include key government agencies and other related agencies.
1	1.8.	1.8.0.	portal building confidence
1	1.8	1.8.1	The proposed Portal should have a Copyright and Privacy Policy prominently displayed on the homepage.
1	1.8.	1.8.2	portal should include comprehensive Terms and Conditions statements linked from all important pages.
1	1.8.	1.8.3	Bidder must ensure that after appropriate validation by w3c/ or equivalent organizations. Once validations are passed, the logo from the respective organization should be positioned and displayed in the Portal to improve users' confidence.
1	1.9	1.9.0	e-Participation
1	1.9.	1.9.1	Surveys And Opinion Polls
1	1.9.	1.9.2	For users, online surveys and opinion polls can be published for e-participation in the Portal.
1	1.9.	1.9.3	The site administrator should be able to create and publish new surveys and opinion polls and analyze the results of the survey and opinion polls without any software coding.
1	1.9.	1.9.4	The portal users should be able to view the survey/opinion poll results.
1	1.10.	1.10.0	Calendar
1	1.10.	1.10.1	The Portal should contain a calendar of events within the MOCIIP. The Calendar should be easy to use and can be modified easily through the abovementioned content management tool.
1	1.11.	1.11.0	E-Forms

1	1.11.	1.11.1	The Portal should contain electronic forms that contribute to the service and facilitate the process of procedures
1	1.11.	1.11.2	The e-forms should be developed taking into account the following minimum functionalities: - Develop e-forms with workflow identification based on the MOCIIP process. - The workflow must be clear to the user. The user can easily track his request.
1	1.11.	1.11.3	- Presenting the application to the concerned authorities for approval as a template containing the Ministry's logo. The Template is determined by the specialists of MOCIIP
1	1.11.	1.11.4	Workflow Management System: - It should be an open-source workflow management tool with extensive features and automated tools to create efficient workflows suitable for MOCIIP team. - It should be created on fundamental principles of design, automation, and improvement. - The workflow management system should be agile in handling workflows for MOCIIP with extensive data visualization capabilities. - It includes the Tasklist user interface to manage task assignments, user communication, and track progress. - It should have features advanced analytics tools and dashboards to manage reports of workflows.
1	1.12.	1.12.0	Feedback
1	1.12.	1.12.1	The Portal should be able to emphasize and enhance dialogues and two-way communication among employees in the Ministry.
1	1.12.	1.12.2	All pages on the Portal that provide information, instructions, articles, or news should contain a text area for comments allowing the user to enter his notes and comments. It should only be possible to allow moderated messages as needed.
1	1.12.	1.12.3	Portal pages should contain a simple opinion poll asking the user to rate his usefulness in finding the page.
1	1.12.	1.12.4	Remarks and poll results should be forwarded to concerned employees. Also, the concerned user must be able to produce

			customizable feedback reports, and they should be able to send responses to these comments as appropriate.
1	1.12.	1.12.5	The Portal must store user feedback for later measuring satisfaction and producing different metrics.
1	1.13.	1.13.0	Alerts
1	1.13.	1.13.1	The Portal should provide alert services to its users. Alert services should enable registered users to indicate their interest in some of the information or services provided by the Portal and allow them to register to receive alerts for any updates or additions
1	1.13.	1.13.2	The Portal should enable customers to receive important alerts through email or SMS to keep them aware of the progress of their e-service request and/or the required actions to process their e-service requests.
1	1.13.	1.13.3	The Portal should support sending alerts through email or SMS to registered users.
1	1.13.	1.13.4	Registered users should also be able to change their preferences regarding what to receive alerts for or how to receive them.
1	1.13.	1.13.5	The Portal must have the ability to enable/disable SMS notifications.
1	1.13.	1.13.6	The Portal must support integration with SMS gateway system.
1	1.13.	1.13.7	MOCIIP Authorities need to have the option to choose the list of people to whom the SMS needs to be sent. For example An alert to inform the registered users about a recently published news item.
1	1.14.	1.14.0	Current functionality and information
1	1.14.	1.14.1	Bidders should create the required services from scratch in the Portal
1	1.14.	1.14.2	Any changes to the functionality and information available in the Portal must be discussed and approved by MOCIIP before implementation.
1	1.14.	1.14.3	Bidders are expected to analyze the content and suggest an improved layout considering best practices followed globally.

1	1.15.	1.15.0	Mobile Content
1	1.15.	1.15.1	The Portal should be displayed correctly on all types of the mobile device.
1	1.15.	1.15.2	There should not be an m-GovernmentAgency.gov.om site that should be automatically redirected when a user accesses the Portal from a mobile device. For smartphone users, smartphone browsers can render normal web pages.
1	1.15.	1.15.3	The mobile site should pass the W3C mobile OK checker (http://www.w3.org/TR/mobileOK-basic10-tests/).
1	1.15.	1.15.4	Ministry-Specific Requirements Tenderers must highlight their experience and showcase and assist MOCIIP in finalizing the full list of sections that MOCIIP should implement based on the ITA portal guidelines and Bidders' experience of implementing portals with other similar organizations. Below is the list of minimum functionalities that MOCIIP currently intends, which will be finalized during the project's requirement gathering and prototype phase.
1	1.16.	1.16.0	About The Ministry
1	1.16.	1.16.1	The Portal must serve as the single stop gateway for all users looking for: - Information about MOCIIP. - MOCIIP Announcements. - Details of the MOCIIP include The Royal Decree, Ministers Message, and MOCIIP Policy. - Services offered by MOCIIP and its affiliated organizations.
1	1.17.	1.17.0	Ministry Programs
1	1.17.	1.17.1	A section to list the details of the various programs related to the MOCIIP activities.
1	1.18.	1.18.0	Royal Decrees
1	1.18.	1.18.1	The Portal should have a section where the Royal Decrees can be published. The site should allow the option to highlight the new Decrees, manage the content (add/edit/delete), provision to archive, etc.

1	1.19.	1.19.0	Royal Orders
1	1.19.	1.19.1	The Portal should have a section where the Royal Orders can be published. The site should allow the option to highlight the new Orders, manage the content (add/edit/delete), provision to archive, etc.
1	1.20.	1.20.0	Laws and Conventions
1	1.20.	1.20.1	The Portal should have a section where the Laws and Conventions can be published. The site should allow the option to highlight the new Laws and Conventions, manage the content (add/edit/delete), provision to archive, etc.
1	1.21.	1.21.0	Ministerial Committees
1	1.21.	1.21.1	The Portal should have a section where the details of the various committees and purpose of these committees can be published. The site should allow the option to highlight the new committees, manage the content (add/edit/delete), provision to archive, etc.
1	1.21.	1.21.2	There should also be an option to upload photographs of members who are part of these committees and publish the various reports and findings of these committees if needed.
1	1.22.	1.22.0	Contact Us Page
1	1.22.	1.22.1	portal should have a 'Contact Us page linked from the home page and all relevant places in the Portal. The contact details of important functionaries in the Ministry should be given in the 'Contact Us section.
1	1.22.	1.22.2	Bidders should provide a tool to display a Phone Directory which contains contact details of all relevant departments and sections of the MOCIIP. The functionality should be simple so that it can be maintained easily by the respective section.
1	1.23.	1.23.0	NEWS & Press releases
1	1.23.	1.23.1	The Portal should include a news section that displays categorized and searchable news items. Published news items should be related to the MOCIIP with all its different departments and services.
1	1.23.	1.23.2	Announcements of new services, new portal features, updated regulations or laws, events, conferences or any other type of

			relevant news should be available within the news section of the Portal.
1	1.23.	1.23.3	News items should be searchable by various search criteria.
1	1.23.	1.23.4	The Portal's homepage and internal pages should automatically display relevant news headlines and allow users to click on them for more details.
1	1.23.	1.23.5	News / Press releases should be displayed along with the date, and these are organized as per the archival policy of the Portal
1	1.23.	1.23.6	Online news syndication features should also be available on news pages so interested users can keep up to date with MOCIIP portal news through their news aggregators.
1	1.23.	1.23.7	The site should offer an email distribution of a newsletter
1	1.23.	1.23.8	The site should offer a "What's New" section to provide the recently added/updated site details.
1	1.24.	1.24.0	ELibrary
1	1.24.	1.24.1	Option to publish and view the catalog of books in the MOCIIP Library.
1	1.25.	1.25.0	Photo Gallery, Audio, And Video
1	1.25.	1.25.1	The Portal should also host photos and videos related to MOCIIP. Using the proposed content management tool, the Portal should have Photo /Video Album functionality.
1	1.26	1.26.0	FAQ
1	1.26.	1.26.1	The proposed Portal should show all common queries and their replies related to MOCIIP.
1	1.26.	1.26.2	It should be possible to create different sets of FAQs targeted for different user groups of the Portal. The Portal should automatically display the relevant FAQ based on the user type.
1	1.26.	1.26.3	The exact mechanism for the population of actual FAQ content should be agreed upon with the Documentation team responsible for the "Documentation" sub-project.
1	1.26.	1.26.4	The process and procedures section also needs to be provided a link, and the content population for this section needs to be

			carried out in coordination with the "Documentations" sub-project team.
1	1.27.	1.27.0	Schemes
1	1.27.	1.27.1	There should be a provision to list the schemes or programs Ministry offers for various target segments. For example, Schemes and programs for SMEs etc.
2	Scope of Portal Non-Functional Requirements		
2	2.1.	2.1.0	Performance Requirements
2	2.1.	2.1.1	The Bidder needs to submit an expected Portal performance report and justifications.
2	2.1.	2.1.2	The Bidder should also highlight the data growth expectation based on prior implementation experience.
2	2.2.	2.2.0	Scalability Requirements
2	2.2.	2.2.1	Bidders must ensure well-balanced load distribution on the various hardware and software components to ensure no congestion in any of the solution hardware components occurring with the growing load on the Portal.
2	2.2.	2.2.2	Bidders must clearly specify the upgrade path for the solution components (software and hardware) and how the solution can handle additional loads.
2	2.3.	2.3.0	Integration Requirements
2	2.3.	2.3.1	Integration with Oman government Systems Bidders are requested to read the current Technology Environment- Other Implementation Details section before estimating the effort for the functionalities stated in this section.
2	2.3.	2.3.2	The system should integrate with the Single Sign On (SSO) Functionality offered by the Government portal.
2	2.4.	2.4.0	Security
2	2.4.	2.4.1	The pages of the Portal that deal and other critical data should only be accessible via a secured link.

2	2.4.	2.4.2	The following security coding guidelines must be followed: Do not hard code usernames/passwords in logs and application code - Do not maintain plain text passwords in configuration files and database - Do not use insecure protocols to exchange data with external parties - Prevent any information leakage through error messages - Shield the system errors and debug information from the end-user, which might reveal the technology and product used - A session should expire when no activity or when the maximum period has elapsed - Do not put sensitive data in URL parameters - Log all access to sensitive data - Do not rely on client-side input validation; always validate input - Check input for cross-site scripting (XSS) - Users should not use application credentials to access any system or any database
2	2.4.	2.4.3	Ministry may engage a 3rd party organization or MCTIT Information Security Division to conduct penetration testing, and Bidders are expected to fix any gaps identified.
2	2.4.	2.4.4	The database layers of the implemented solutions should employ user input filtration, user input strong typing, and other security features to prevent SQL injection threats and vulnerabilities. Avoid any dynamic SQL in the implementation prone to SQL injection attacks.
2	2.5.	2.5.0	Accessibility
2	2.5.	2.5.1	it should be accessed from various browsers and operating systems by people with different abilities and likings; accessibility guidelines must be followed as closely as possible.
2	2.5.	2.5.2	The functionality of Portal should be operable through a keyboard.
2	2.5.	2.5.3	The site's content should be read aloud by relevant software.
2	2.5.	2.5.4	The site content should be possible to be resized.

2	2.5.	2.5.5	The site should meet the W3C's Web content accessibility guidelines Priority 1.
2	2.5.	2.5.6	Alternate Content Delivery Channels.
2	2.5.	2.5.7	Bidders are expected to ensure that the content displayed in the Portal (like news, announcements, etc.) can be made available to alternate delivery channels like mobile/tablet etc., as and when required. To enable that, all the content in the Portal should be available via a web-service layer.
2	2.5.	2.5.8	Bidders must work with the Mobile development team to ensure that some of the information stated above is made available as Webservice to Mobile App that is planned.
2	2.6.	2.6.0	Authentication & Authorization
2	2.6.	2.6.1	As stated earlier, the user Authentication should be done using MCTIT's SSO.
2	2.6.	2.6.2	Users of the Portal should be classified into different categories; These categories are not mutually exclusive, as a user can belong to multiple categories simultaneously.
2	2.6.	2.6.3	Provide users with a customized and targeted experience based on their classification and interest.
2	2.6.	2.6.4	Each of the Portal sections should categorize its content and services based on various domains or topics relevant to that section's user category.
2	2.6.	2.6.5	All sections should have a unified Look & Feel, and users of various sections should not feel they are accessing different portals.
2	2.6.	2.6.6	Common Portal functionalities should be shared between the Portal's different sections and accessible to all user types.
2	2.6.	2.6.7	Provide flexible and customizable portal page layouts for different sections; the layouts might differ based on the requirements of what needs to be displayed for each type of user.
2	2.6.	2.6.8	There would be fixed elements throughout the pages of the Portal, such as the header, footer, navigation links, common Portal functionality and others. For each of the sections, the main parts of the pages would be tailored and customized for

			the type of users for that section to provide the required content in the most easily accessible and beneficial way to maximize the value of the Portal.
2	2.7.	2.7.0	Development/ Coding
2	2.7.	2.7.1	The new Portal should have a solid yet flexible information architecture and layout.
2	2.7.	2.7.2	For the Portal to be smoothly upgraded/updated, the winning Bidder must commit to an open, transparent and annotated method of coding to ensure that they or any other development house can upgrade the Portal easily in the future.
2	2.7.	2.7.3	A very structured and modular approach to coding is required. For example, key site variables should be held in one file, functions and classes of coding must be used instead of replicating lines of code, files and folders should follow a standard naming convention, etc.
2	2.7.	2.7.4	Post the design, development and audits; the Bidder shall hand over the complete code of the Portal applications to MOCIIP in softcopy format.
2	2.7.	2.7.5	The Bidder must also submit documentation highlighting the mapping process for each service.
2	2.7.	2.7.6	Bidder must also submit documentation highlighting the Themes, Style Sheets and other aspects implemented in the Portal so that the MOCIIP team can take over the future developments or enhancements of the looks and feel Themes and functionalities.
2	2.7.	2.7.7	The site should meet the W3C's Web Content Accessibility Guidelines Priority 1
2	2.7.	2.7.8	The Portal should use the latest web technologies like HTML5 and AJAX to load pages for better user experience and performance partially.
2	2.7.	2.7.9	portal should use Cascading Style sheets to control layouts/styles, not inline style.
2	2.7.	2.7.10	Labels should be provided when content requires input from the users.

2	2.7.	2.7.11	All input errors should be presented in text.
2	2.7.	2.7.12	Focus should not be trapped in any component while navigating using the keyboard.
2	2.7.	2.7.13	Metadata for pages like title, keywords, description and language should be appropriately included.
3	Scope of the Portal's Hardware/Hosting Infrastructure.		
3	3.1.	3.1.0	General Requirements
3	3.1.	3.1.1	Bidders are required to refer to the Section Hardware Components and Current utilization section. MOCIIP does not have plans to procure hardware; however, after analyzing the information, Bidders feels hardware is required, which should be highlighted.
3	3.1.	3.1.2	Bidders must ensure the Portal is hosted within the existing MOCIIP's private cloud infrastructure.
3	3.1.	3.1.3	The Portal should be accessible to the intended audience efficiently and securely 24 x 7.
3	3.1.	3.1.4	The Bidder should take all possible security measures to prevent defacement/ hacking of the Portal and have a contingency plan for such situations.
4	Scope of Portal's Maintenance and Support		
4	4.1.	4.1.0	General Requirements
4	4.1.	4.1.1	Bidders need to work with the existing Managed services provider of MOCIIP and ensure that the required documentation and details are transferred to ensure that the existing Managed Operations provider can handle Maintenance and support at MOCIIP.
4	4.1.	4.1.2	Bidders are also required to work with the existing service provider and assist in making any configuration changes or setting up any configuring parameters to ensure that the existing service provider can address performance monitoring and other reporting requirements.
4	4.1.	4.1.3	Ensure that upon final acceptance of the Portal, any OEM warranties will be transferred to MOCIIP at no additional charge

4	4.1.	4.1.4	Ensure that all warranty, Maintenance & support documentation (whether expired or not) will be delivered to MOCIIP at the issuance of the final acceptance certificate.
4	4.1.	4.1.5	Bidders must provide a Premium Level warranty and support through the technology Bidder for all software used in the Portal.
4	4.1.	4.1.6	Bidders' warranty must cover all work activities in the contract against all design, manufacturing, and environmental faults until the issuance of the final acceptance.
4	4.2.	4.2.0	Warranty Requirements
4	4.2.	4.2.1	The warranty duration shall be mandatory for one year from the final acceptance date of the MOCIIP portal, and Bidder needs to fix any bugs or issues in the Portal.
4	4.2.	4.2.2	The warranty shall include the repair or replacement of the products/components during the support period by the Bidder. The replacement products/components shall meet the related specifications without further repair or modification.
4	4.2.	4.2.3	Bidders shall be liable for all costs including, but not limited to, the costs of material, labor, travel, transport and living expenses associated with the collection and return of the components covered by the warranty, Maintenance & support.
4	4.2.	4.2.4	Bidders shall work with the existing Managed Operations team at MOCIIP and ensure that the appropriate SLA is defined and configured in line with the existing ones for the One Stop Shop system.
5	Scope of Knowledge Transfer and Training		
5	5.1.	5.1.0	General Requirements
5	5.1.	5.1.1	Bidder shall submit its proposed plan and approach for conducting the knowledge transfer and training across MOCIIP to deliver the required knowledge.
5	5.1.	5.1.2	Bidder is expected to transfer knowledge and train these staff to ensure that the system can be maintained effectively after the exit of the Bidder.

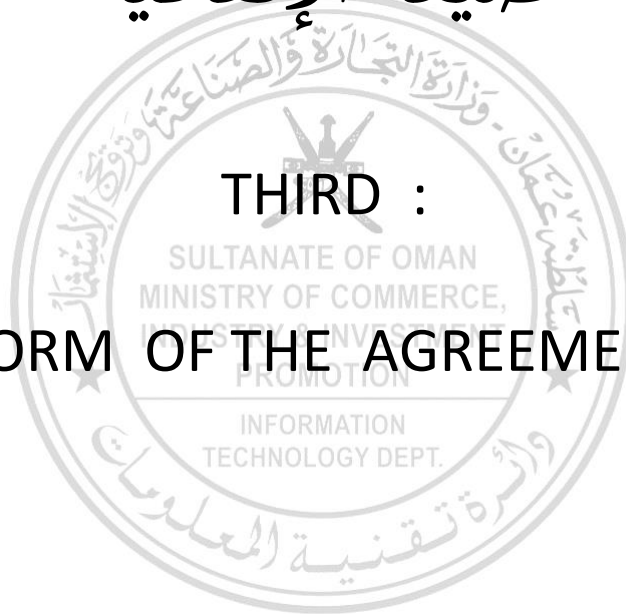

5	5.1.	5.1.3	Ensure source code of all software components developed or customized during the implementation of the entire solution must be handed over to MOCIIP after project completion
5	5.1.	5.1.4.	Bidders must provide knowledge transfer and training for the Portal, CMS, Themes, CSS and other components throughout the project implementation phases covering various user groups.
5	5.1.	5.1.5	All proposed pieces of training must be delivered at MOCIIP premises and be classroom-based and instructor-led.
5	5.1.	5.1.6	Online / Remote presentations (e.g., WebEx sessions or the like) will not be accepted as part of the official training program.
5	5.1.	5.1.7	Bidders must discuss the training approach, courses, sessions and tools to support the training and knowledge transfer.
5	5.1.	5.1.8	Bidders are required to handle all training activities, including but not limited to providing the training venue, site setup, P.C.s, training material, standard office supplies and any other support tasks required to ensure successful training.
5	5.1.	5.1.9	Bidders must also provide electronic and hard copies of all training materials used during training sessions. All training courses are required to be by certified/authorized trainers.
5	5.1	5.1.10	Bidders are required to define the skills and expertise needed to maintain, support and undertake future enhancements.
5	5.1	5.1.11	Bidders must professionally train two technicians in the programming language used in carrying out the work to obtain accredited certificates.
6	Scope of work of Project Implementation and Project Management		
6	6.1.	6.1.0	General Requirements
6	6.1.	6.1.1	Bidders are required to provide their requirements for on-site project implementation from MOCIIP premises, where the project scope will be developed, tested and deployed
6	6.1.	6.1.2	Bidder to provide the approximate physical space and setup required by Bidder's project team during the various phases of this project.
